

**QUALITY MANAGEMENT  
ESSENTIALS (QME)  
ASSESSMENT**

Quality in all forms, from product manufacturing to customer service, under QME assessment will improve a company's value, cost efficiency and customer relationship.

QME assessment is granted to companies that demonstrate compliance and regulatory requirements with the ISO 9001 standard. PECB MS will provide you with this assessment by demonstrating that your product or services meet the major criteria and is in conformance with ISO 9001. With this assessment, which is a useful tool to add credibility, companies will show compliance to the specific clauses implemented in their management system, such as:

- Being aware of the context of the organization
- Proactively scanning their organization
- Being able to react to a crisis that occurs
- Communicating a positive message to staff and customers
- Ensuring management's support for the implementation
- Determine and maintain required infrastructure
- Planned and controlled processes
- Providing product and service related information
- Determine design stages considering activities such as verification and validation, control of design, design review, resources needed for design and development, etc.

## **What is QME about?**

QME consists of the major clauses of ISO 9001, which allow different departments at a company to implement them with less direction from management and without risking the fundamental concepts of ISO 9001 structure. Implementing PECB MS's QME framework and obtaining the assessment for your organization is the right decision towards demonstrating the ability of practicing quality management and addressing the challenges involved in an efficient way.

The design objectives for this assessment are:

- Easy implantation steps
- Committed to customer satisfaction
- Ensuring confidentiality and impartiality
- Reduced management involvement
- Non-certifiable

QME assessment is granted by a third-party, such as PECB MS, upon verifying through an audit that the organization has fulfilled the considered essential clauses. This assessment is then maintained through scheduled annual surveillance audits by the registrar, with re-assessment of the Quality Management Systems performed on a triannual basis.

### **Benefits of QME assessment to your organization:**

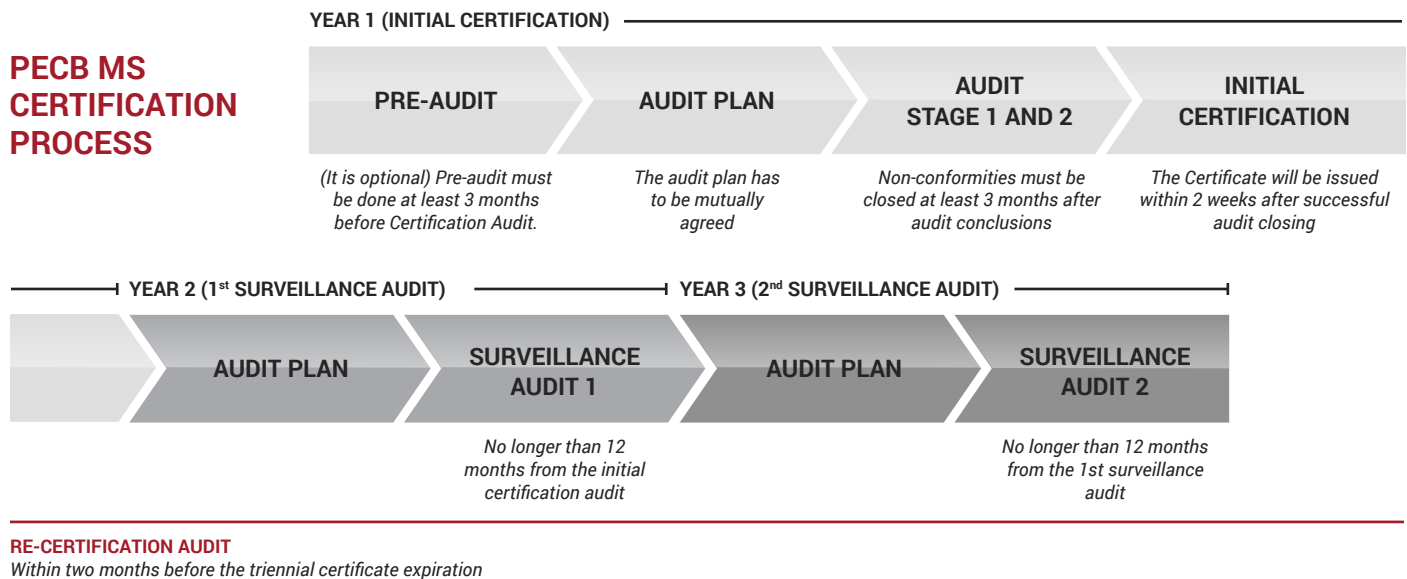

- Easy implantation steps
- Does not require extra training for certified ISO 9001 implementers and auditors
- Committed to customer satisfaction
- Ensuring confidentiality and impartiality
- Identifies and encourages more efficient and time saving processes
- Reduced management involvement
- Non-certifiable
- Marketing advantage through international recognition of the certificate
- Benefits of QME assessment
- Improve performance of affected processes
- Serves as a feasible stepping stone to achieve full ISO 9001 certification
- Reduce implementation costs

PECB MS is specialized in the certification of management systems on a wide range of international standards. As a global provider of audit and certification services, PECB MS offers its expertise on multiple fields, including but not limited to Information Security Essentials.

We help organizations to show commitment and competence with internationally recognized standards by providing this assurance through certification and assessment against rigorous, internationally recognized competence requirements. With a global coverage of over 150 countries worldwide, our mission is to provide our clients comprehensive services that inspire trust, continual improvement, demonstrate recognition, and benefit society as a whole.
